

Large Surface Folding Pool ET Large

The pool is primarily designed as a mobile environmental protection device especially suitable for quick response to accidents wherever the environment is threatened by leaks of hazardous substances into soil and/or water. It functions as a portable reservoir for hygienic and decontamination purposes. It has proved to be very efficient in preventing leaks of oil and oil-based products or chemicals in industry, by removing spilt fuel, decontaminating and cleaning vehicles of all types.

- ▶ Packed construction takes minimal space
- ▶ Simple and quick unfolding
- ▶ Easy to drive in
- ▶ The unique patented design
- ▶ Protective pad and under-wheel tracks are standard accessories
- ▶ Production of other dimensions is available according to individual customer's requirements
- ▶ Possibility of adding of drain hole and ball valve

**The special folding pool with
the unique patented design**

Simple folding

Possibility of adding of drain hole and ball valve

Drive in through reclined side wall on under-wheel tracks

Side supports on the outer side of the spill bund tracks

Examples of uses

Technical details

Unlike standard products the pool is made of thick PVC fabric with a special protective proofing. The fabric itself is proofed with polyethylene (PES/PVC 900 g/m²) resistant to the effects of industrial fluids, chemicals, hydraulic lubricants and all oil and oil-based products such as fuel oil, diesel fuel, gasoline, etc. (see Chemical resistance certificate in the relevant chapter at the end of catalogue).

The product is protected by registered utility model (technical patent) no. 22118 lodged with the Industrial Property Office.
