

Impermeable emergency barrel insert

It is intended for use in emergency situations as a special insert especially into metal drums (temporary substitution of plastic drums) and to avoid leakage, leaking or damaged packaging that contain liquid or solid hazardous environmentally damaging substance.

- ▶ Long-term corrosion protection of metal drums
- ▶ For barrels up to 85 gal capacity
- ▶ Resistant material
- ▶ Twice welded joints

For fast capture and short-term storage of contaminated waste

Determined for normally used UN barrels up to 85 gal capacity

The joints are twice welded in order to avoid any possible leakage

Technical details

The insert is made of special impermeable PVC foil, resistant to chemical and petroleum substances (see Chemical resistance certificate in the relevant chapter at the end of catalogue), suitable for use at temperatures between -40 °F and +158 °F.

Type	Dimensions (in)	Capacity (gal)
Impermeable emergency barrel insert ET IL01	25 (diameter) × 37 (height)	30
Impermeable emergency barrel insert ET IL02	25 (diameter) × 52 (height)	44
