

Magnetic Drain Cover MDC

Chemical resistance certificate

The MDC is designed for both emergency response and as prevention.

Resistance levels:

- A resistant
- B resistant for at least 3 hours
- C non-resistant

When the product is used for emergency response, it is often impossible to accurately determine the substances captured. This list is prepared as a guideline for chemical resistance. The MDC is made of strontium ferrite magnetic (cca 90 %) and chlorinated polyethylene (cca 10 %). The MDC is resistant to most common substances like: Petrol, diesel, kerosene, mineral oils, motor oils, grease, animal and vegetable fats, cooking oils and hot water. Possible product damage depends on the time of exposure, concentration and temperature of substances.
