

# Decontamination spill berm for rescue and emergency units

For safe and effective human decontamination

Collapsible spill berm specially designed to meet the requirements of emergency and rescue units for decontamination of individuals or equipment, as well as for catchment of hazardous materials in case of spills or other environmental disasters. The flexible structure of the berm enables use in any terrain including hard-to-reach places. The dimensions of the berm are optimised for decontamination of a standard individual with the outstretched arms.

- ▶ Optimised dimension  
78.7 × 78.7 × 7.9 in
- ▶ Quick assembly in any terrain
- ▶ Flexible structure enables use in areas with various barriers
- ▶ Easy handling thanks to side handles
- ▶ Side supports to ensure higher stability
- ▶ Possibility of adding of drain hole for easier removal of contaminated materials by pumping or draining

Folded bund can be easily carried by a single person

Decontamination mats

## Technical details

The berm is self-supporting, made from thick fabric with a protective proofing layer (PES/PVC 1.5 lb/10.7 ft<sup>2</sup>). The material is resistant to decontamination chemicals, oil products and acids (see Chemical resistance certificate). Stability is ensured by means of added side supports. Side handles are attached for easy handling.

The container is equipped with an optional drain hole with a cover flap to drain the berm without using of a submersible pump. Thanks to this the container can be used for decontamination as well as a standard spill berm if needed.

The temperature range for using the berm is from -22 °F to +158 °F.

The bag is a standard part of the product.

Optional accessories: protective pad and special liner for prolonging the durability of the spill berm. As an optional accessory, we also offer special decontamination mats, which significantly help to increase the efficiency of the decontamination process.

Type	Dimensions (in)	Volume (gal)	Pack size (in)	Weight (lb)
