

ET-Roller 6

Electric Roller for fire hoses up to 5" – powered by 18 V batteries

Compact battery-operated Foldable Fire Hose Roller with a powerful built-in electric motor powered by two 18 V batteries minimizes the time required for reeling unwound fire hoses after action or training. The device can be also used for emptying filled fire hoses or for controlled unwinding of an already wound hose.

- ▷ 660W electric motor powered by two 18 V batteries
- ▷ Quick and convenient winding of both dry and wet fire hoses up to 5" (A110)
- ▷ Choice of the type of removable carrier according to the size of the hose to be wound up
- ▷ Easy handling, quick assembly, folded to transport position in a single move
- ▷ REVERSE function – for convenient unwinding of already wound hose
- ▷ Also usable for draining water from already filled fire hoses
- ▷ Ergonomic robust design with many improvements compared with standard rollers:
 - ▶ easy-to-operate fire hose winding system
 - ▶ removable fire hose holder – ensures easy handling of a wound hose
 - ▶ unique fold-out chassis – stabilizes the winder and keeps it steady during winding

- **Electric:**
strong engine powered by two 18 V batteries
- **Powerful:**
1 m of hose/1 second
- **Universal:**
for fire hoses up to 5"
- **Foldable:**
easy to transport
- **Safe:**
intelligent engine management
- **Robust:**
durable steel frame

removable carrier
"DRUM" type

removable carrier
"2 FORKS" type

Possibility of winding while walking

WORK button on the handle

Roller switched to winding position

Hose protector protects the fire hose and coupling against fraying during winding

Electric motor powered by 18 V batteries

Winding procedure with "DRUM" type carrier

Technical details

Robust steel frame. The heavy-duty parts of all the shafts are made of high-strength steel. Durable surface finish – powder-coated or galvanized. Powerful DC motor, water and dust resistant. Motor powered by two 18 V batteries (not included). Safe operation thanks to low working voltage. Durable control elements. Unique design ensuring high stability during winding and allows for easy handling of the wound hose. As an optional accessory we recommend the hose protector which protects the fire hose and coupling against abrasion during the static winding.

Principle

The roller is very easy and quick to operate. Fit the straightened fire hose onto the selected type of removable carrier. Set the main switch to winding mode – ON. Press the WORK button on the handle and wind the full length of the hose. Then turn off the roller by changing to the position OFF. We can comfortably take the fire hose off thanks to the removable carrier immediately after winding, or if it needs to be moved closer, for example to the fire truck, we can leave it on a roller and take it to its destination, where it is subsequently removed from the roller. The roller can also be used for convenient draining water from the filled hose by pulling it over guiding coil or for controlled unwinding wound hoses using the REVERSE function.

Safety

- Safety limit on winding power (automatically switches off if limit is excessively exceeded)
- Smooth start, immediate stop
- Safe working voltage – 2 × 18 V

Name	ET-Roller 6		
Dimensions in use (w × d × h)	480 × 360 × 1230 mm		
Dimensions of folded roller (w × d × h)	480 × 270 × 930 mm		
Height of roller with handle at the maximum	1230 mm		
Package dimensions	1000 × 670 × 380 mm		
Weight without fire hose	36,5 kg without batteries		
Types of fire hoses that can be wound	A, B, C, D, up to 5"		
Optional accessories at extra cost	Material	Dimensions	Weight (kg)
Hose protector	stainless steel	228 × 352 × 160 mm (w × d × h)	1,1
Removable carrier – DRUM type	stainless steel	ø 214 mm, length 200 mm	5,6
Removable carrier – 2 FORKS type	stainless steel	pitch 70 mm, length 180 mm	2,7
