

ET-Roller 6

Electric Roller for fire hoses up to 4" – powered by Milwaukee batteries Compact batteryoperated Foldable Fire Hose Roller with a powerful built-in electric motor powered by two Milwaukee batteries minimizes the time required for reeling unwound fire hoses after action or training. The device can be also used for emptying filled fire hoses or for controlled unwinding of an already wound hose.

Ð

- 660W electric motor powered by two M18 Milwaukee batteries
- A unique Quick Release Mechanism for swift replacement of carriers designed for winding various sizes of fire hoses
- Telescopic handlebars for easy operation of the roller
- Quick and convenient winding of both dry and wet fire hoses up to 4"
- Two types of removable carriers (DRUM or 2 FORKS) according to the size of the hose to be wound up
- Easy handling, quick assembly, folded to transport position in a single move
- REVERSE function for convenient unwinding of already wound hose
- Suitable for various winding methods smooth winding of the hose by the coupling as well as hoses folded in half
- Also usable for draining water from already filled fire hoses

- Electric:

strong motor powered by two Milwaukee batteries

- Powerful: easily winds 131ft, 121lb, 4" hoses
- Versatile: for fire hoses up to 4"
- Foldable: easy to transport
- Safe: intelligent motor management
- Robust: durable steel frame

Electric motor powered by Milwaukee batteries

Technical details

Robust steel frame. The heavy-duty parts of all the shafts are made of high-strength steel. Durable surface finish – powder-coated or galvanized. Powerful DC motor, water and dust resistant. Motor powered by two Milwaukee batteries (not included). Unique design ensuring high stability during winding and allows for easy handling of both the winder and the wound hose. Quick Release Mechanism for swift carrier replacement, allowing the winding of fire hoses of various sizes. As an optional accessory we recommend the "hose protector" to prevent abrasion of the fire hose and its fittings during the winding process.

Principle

The roller is very easy and quick to operate. Fit the straightened fire hose onto the selected type of removable carrier. Set the main switch to winding mode – ON. Press the WORK button on the handle and wind the full length of the hose. Then turn off the roller by changing to the position OFF. We can comfortably take the fire hose off thanks to the removable carrier immediately after winding, or if it needs to be moved closer, for example to the fire truck, we can leave it on a roller and take it to its destination, where it is subsequently removed from the roller. The roller can also be used for convenient draining water from the filled hose by pulling it over guiding coil or for controlled unwinding wound hoses using the REVERSE function.

Safety

- Safety limit

 on winding power
 (automatically
 switches off if limit
 is excessively
 exceeded)
- Smooth start, immediate stop
- Safe working voltage
 2 × 18 V

Name		ET-Roller 6	
Dimensions in use (w \times d \times h)		$19 \times 14 \times 48$ in	
Dimensions of folded roller (w \times d \times h)		$19 \times 11 \times 37$ in	
Height of roller with handle at the maximum		48 in	
Package dimensions		$39 \times 26 \times 15$ in	
Weight without fire hose		81 lb without batteries	
Types of fire hoses that can be wound		up to 4"	
Optional accessories at extra cost	Material	Dimensions	Weight (lb)
Hose protector	stainless steel	$9 \times 14 \times 6$ in (w $\times d \times h$)	2.4
Removable carrier – "DRUM 4" type - for hoses up to 4"	stainless steel	ø 8 in, length 7-7.5 in	16.6
Removable carrier – "2 FORKS" type - for hoses up to 3"	stainless steel	pitch 3 in, length 7 in	6
